SUMMARY

Backend Software Engineer with 4+ years of experience developing enterprise web applications using Laravel, PostgreSQL, and REST APIs. Experienced in designing scalable backend systems, ERP integrations, asynchronous job processing, and optimizing high-volume database operations. Also proficient in React and Next.js for building modern frontend applications.

PROFESSIONAL EXPERIENCE

PT. Apparel One Indonesia, *Fullstack Developer* 01/2024 – Present | Semarang, Indonesia

- Developed and maintained a Warehouse Management System (WMS) used for operational stock tracking and logistics.
- Built backend modules for stock movement, reporting, and system integrations.
- Integrated WMS with ERP and external services using REST APIs.
- Optimized database queries and improved system performance for large datasets.
- Wrote clean, modular, and maintainable code following Laravel best practices.
- Collaborated with system analysts and stakeholders to translate business needs into technical solutions.

Digital Breeze Interactive, *Junior Game Programmer* 08/2022 – 10/2023 | Bandung, Indonesia

- Developed Unity based games based on client requirements.
- Implemented gameplay systems using OOP and design patterns.
- Debugged and optimized game performance and logic.
- Collaborated with designers and developers to deliver features on schedule.
- Applied modular architecture to keep game code scalable and maintainable.

PT. Bina Busana Internusa (BBI Group), *ERP Developer* 12/2019 – 08/2022 | Semarang, Indonesia

- Developed ERP modules based on business requirements.
- Implemented database CRUD operations and optimized queries using PostgreSQL.
- Built integrations between ERP modules and external systems.
- Worked closely with business teams to refine workflows and system logic.

PROJECTS

Warehouse Management System (WMS) 01/2025 – Present

Enterprise Warehouse Management System for Manufacturing

• Developed and maintained an enterprise Warehouse Management System (WMS) using Laravel, Filament, PostgreSQL, and Docker.

• Designed and implemented complex inventory workflows including receiving, preparation, supply, handover stock, subcont and quality control.

• Developed a multi-stage import process consisting of file upload, background validation, preview, and asynchronous database persistence to improve reliability and user experience.

• Optimized PostgreSQL queries, views, and indexing for high-volume warehouse data and reporting.

• Implemented role-based administration panels with Filament to manage warehouse operations efficiently.
• Integrated REST APIs and automated business workflows across multiple warehouse modules.
• Technologies: Laravel, PHP, PostgreSQL, Filament, Docker, Linux, Queue, Bus Batch, REST API, Git.

DigiExam , *Online Examination Platform for Schools* 11/2026 – Present
• Developed a SaaS-based online examination platform for schools using Laravel and Flutter.
• Implemented role-based access for administrators, teachers, and students with secure authentication and authorization.
• Built a complete examination workflow including question bank management, exam scheduling, automatic grading, and score reporting.
• Implemented anti-cheating features such as browser tab detection, fullscreen monitoring, and automatic answer submission when violations occur.
• Designed RESTful APIs consumed by Flutter applications for both teachers and students.
• Optimized database performance using PostgreSQL and efficient query design.
• Developed responsive administration dashboards with Filament, enabling schools to manage thousands of student records efficiently.
• Technologies: Laravel, PHP, Flutter, PostgreSQL, REST API, Filament, Docker, Git.

NTK Pump Clinic, *Pump Maintenance & Service Management System* 02/2025 – 08/2025
• Developed a web-based pump maintenance and service management system using Laravel and PostgreSQL.
• Integrated the application with the iDempiere ERP system through real-time API integration, ensuring synchronization of customers, products, service orders, and business transactions.
• Built modules for service requests, work orders, maintenance history, inspection reports, and customer management.
• Designed RESTful APIs and implemented secure data exchange between the application and the ERP system.
• Optimized database performance and business workflows to support reliable real-time data synchronization.
• Collaborated with business stakeholders to analyze operational requirements and deliver scalable software solutions.
• Technologies: Laravel, Livewire, PHP, PostgreSQL, REST API, iDempiere ERP, Git.

Attendance System, *Employee Attendance Management System for Listromart* 09/2025 – 12/2025
• Developed a web-based employee attendance management system for Listromart using Laravel, Filament and PostgreSQL.
• Implemented attendance tracking with clock-in, clock-out, leave management, and attendance history.
• Built role-based dashboards for administrators and employees to manage attendance records efficiently.
• Developed reporting features for daily, monthly, and employee attendance summaries.
• Optimized database queries to ensure fast and reliable attendance processing.
• Implemented RESTful APIs for future integration with mobile applications and third-party systems.
• Collaborated with stakeholders to design business workflows that improved attendance monitoring and reporting.
• Technologies: Laravel, Filament, PHP, PostgreSQL, REST API, Docker, Git.

Listromart E-Commerce, *Frontend Development & Feature Enhancement* 01/2025 – 06/2025
• Contributed to the frontend development of Listromart's e-commerce platform using React and Next.js.
• Developed responsive and user-friendly interfaces for product browsing, shopping cart, and checkout experience.
• Implemented new frontend features and enhanced existing modules based on business requirements.
• Integrated frontend components with existing REST APIs developed by the backend team.

• Improved application performance, responsive layouts, and overall user experience across desktop and mobile devices.
• Collaborated closely with backend developers and UI/UX designers to deliver new features and maintain system consistency.
• Technologies: React Native, TypeScript, Tailwind CSS, REST API, Laravel, Git.

SKILLS

PHP (Laravel 12 • Filament v3 & v5 • Livewire • Eloquent ORM • Queue & Jobs • Notifications • Excel Import (Laravel Excel) • Repository Pattern • REST API Development) | **JavaScript** (ES6+ • Async/Await • Fetch API • DOM Manipulation • Modern JavaScript) | **TypeScript** (Strong Typing • Generic Types • Interface & Type Alias • Node.js • React) | **Node.js** (Express.js • REST API • Authentication • File Upload • PostgreSQL Integration) | **React** (React 19 • Hooks • Context API • Component Architecture • Responsive UI) | **Next.js** (App Router • Static Export • Dynamic Routes • Server Components • Deployment • SEO) | **Tailwind CSS** (Responsive Design • Flexbox • Grid • Animations • Custom Theme) | **PostgreSQL** (Complex Query • View • Stored Function • Performance Optimization • Indexing • DBLink • Query Optimization) | **MySQL / MariaDB** (Query Optimization • Stored Procedure • Backup & Restore • Indexing) | **Docker** (Docker Compose • Container Networking • Multi-service Deployment • Environment Configuration) | **Git** (Git Flow • Branching • Merge • Rebase • GitHub) | **REST API** (CRUD API • Authentication • JSON Response • API Integration) | **Software Architecture** (MVC • MVVM • Repository Pattern • Service Layer • Clean Code • SOLID Principles) | **System Design** (SaaS Development • Queue Processing • Background Jobs • Import Pipeline • Database Design • Scalability)

EDUCATION

Diponegoro University 06/2014 – 12/2019 | Semarang, Indonesia
Bachelor of Engineering (B.Eng.) in Computer Engineering
- Studied computer engineering with a focus on software development, computer systems, databases, and networking.
- Completed coursework in algorithms, data structures, database systems, operating systems, and software engineering.
- Participated in software development projects applying object-oriented programming and system analysis principles.
- Earned a **Bachelor of Engineering (B.Eng.)** degree in Computer Engineering.
